REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Applicants' argument with respect to claim 15 that performing a flip with a front buffer and back buffer is not "a representation of a component of the object is placed in a drawing buffer as the component is being drawn," "transmitting the representation to an animation buffer," and "displaying in an animation window the object in an animated manner from the animation buffer," is persuasive. Further, applicants' argument with respect to claim 21 that supplying a stream of foreground input image pixels and a stream of background input image pixels to a display controller and propagating those pixels to memory elements of a frame buffer is not "a representation of a component of the object is placed in a shared buffer as the component is being drawn," and "displaying in an animation window the object in an animated manner from the shared buffer", is persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Almis R Jankus whose telephone number is 703-305-9795. The examiner can normally be reached on M-F, 8-5.
